RE: RCRA Facility Investigation Work Plan, Modine Manufacturing Company,  
Camdenton, Missouri

Dear Mr. Sanicola:

As discussed in our meeting on June 29, 2000, this letter provides written approval for the implementation of the soil and lead investigation as specified in the RFI Work Plan and MDNR's April 17, 2000 comment letter.

Modine should note that additional subsurface characterization activities by Modine may be necessary pending the results of Sundstrand's investigation of the former Hulett Lagoon and Modine's on-site soil investigations. Such activities may include an additional dye trace investigation and/or the installation of a monitoring well between the former Hulett Lagoon and Modine property. MDNR is willing to meet with Modine to discuss results of both Modine's and Sundstrand's investigation and to determine the necessity for Modine to conduct further investigations.

Modine will notify MDNR at least five days prior to implementation of the Work Plan to allow MDNR the opportunity to observe the site investigation activities.

Mr. Thomas S. Sanicola
